Features	1.Anodic oxidation treated Heat sink and PC housing protects the light from rotting and dust, static electricity 2.Spining or insertion-extraction installation, easy to handle. 3.Straight light-emitting, 360° beam angle. 4.Imported LED chips, high light efficacy, energy-saving. 5.Aluminum PCB with great thermal conductivity function and heat sink, better heat dissipation, ensure long life-span. 6.3 years warrany, lifelong maintainence at cost price. 7.Assembly line work and large-scale production make the performance and quality guaranteed
